AI and AA initiatives

Federal Agencies can unleash the power of their data to improve operations and decision-making with Artificial Intelligence and Advanced Analytics. TFC is guided by our core principles and provides best practices to support to our clients' AI and AA initiatives:

Mission Support: TFC helps agencies make data driven decisions and reduces time to make an impact on their core missions.

Transparency: TFC develops deep understanding of data that allows us to identify where, when, and how data can and should be used.

Accountability: TFC's process ensures that accountability for the impacts of AI and AA systems are appropriately distributed and that adequate remedies are provided.

Safety and Security: TFC ensures the AI it employs is secure and used as intended.

Responsibility and Human Values: TFC works with stakeholders to plan outcomes and long-term effects of AI in alignment with core values.

Fairness and Non-discrimination: TFC recognizes the issue of unconscious bias in AI and structures analysis to maximize fairness and promote inclusivity.

Human Control of Technology: TFC knows that important decisions must remain subject to human review and ensures the AI it employs allows for human oversight and control.
